LUXURY VINYL TILES

The
Original

The Original

Tarkett designers love authentic materials as much as designers and architects, but it is not always possible to use only natural products. “The Original” is a collection that pays attention to this particular challenge.

Selected materials and their patterns were scanned with the utmost precision, carefully processed and printed on one of the most advanced digital printing lines in the industry. “For us the focus was clearly on preserving the authenticity of the raw material” says designer Timothy Jenon.

The result is a collection in which the sharpness of the details goes hand in hand with a great variety of elements in comparison with traditional products. The result is fewer repetitions of the pattern in the installed floor layout. “We also adjusted the sizes of the product towards the design and not the other way around” explained Felix Mohr, the designer responsible for the decor drawings.

“The Original” is a unique collection in which everything is as harmonious as the original, natural materials.

NOTE

Decors from the “The Original” collection have been developed using a variety of colours and light reflections to simulate as realistically as possible the appearance of a real wood or stone floor. This results in differences between the planks in the package.

Although the illustrations were designed to be as close as possible to the original product, the material characteristics of industrially produced vinyl floors lead to deviations in colour and structure. This, combined with the limitations of the printing process, means that the images shown here may differ from the original.
